ABOUT US

Ningbo Huanyu Sanitary ware Co.,Ltd is a young team focus on the shower products include shower head, shower hose, shower column and so on.

We are trade company and we have our own engineer to design the shower mold, then send the design to the professional mold factory. We have a dozen family factory to cooperate with us, once the mold finished, we will send the mold to the factory for producing.

How do we control the cost?

We buy materials together all the family factories. there is no rent, no many workers pressure for the family factory, once we open new mold, we will ask them to give price, then the one who give the best could win the mold

How do we control the quality?

we appoint ABS material (As normal is Chimei 707/757) and chrome factory to guarantee the quality of surface. Once the shower head come out, we will do several test: Life test with life testing machine; chrome test with salt spray test machine and leakage test under different water pressure.

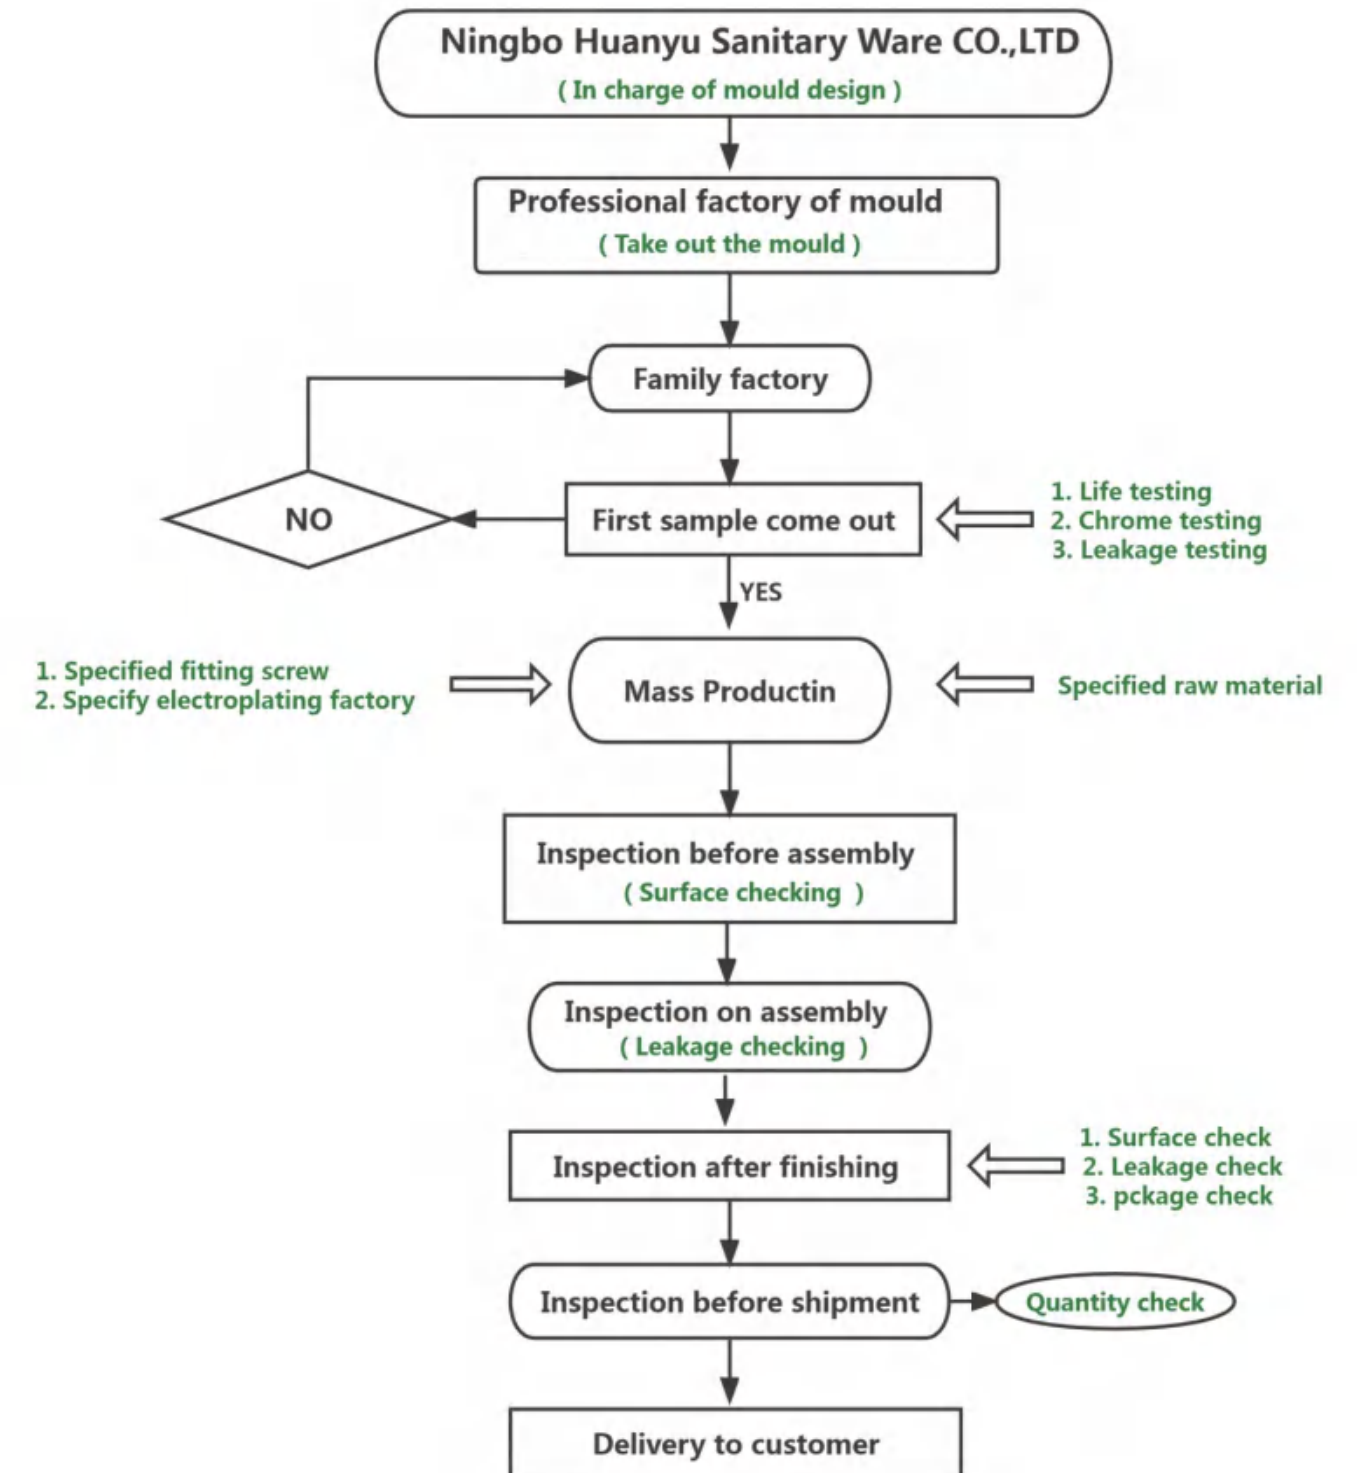

How do we guarantee the delivery time?

We have 180 sets of injection machine currently, if the orders bigger, we could develop more and more family factory, because we are in Cangtian-the center of shower head and shower hose products.

How about the after-sales?

We have many brand customer cooperate with us, such as Ferritalia, Cera, Panasonic and so on.

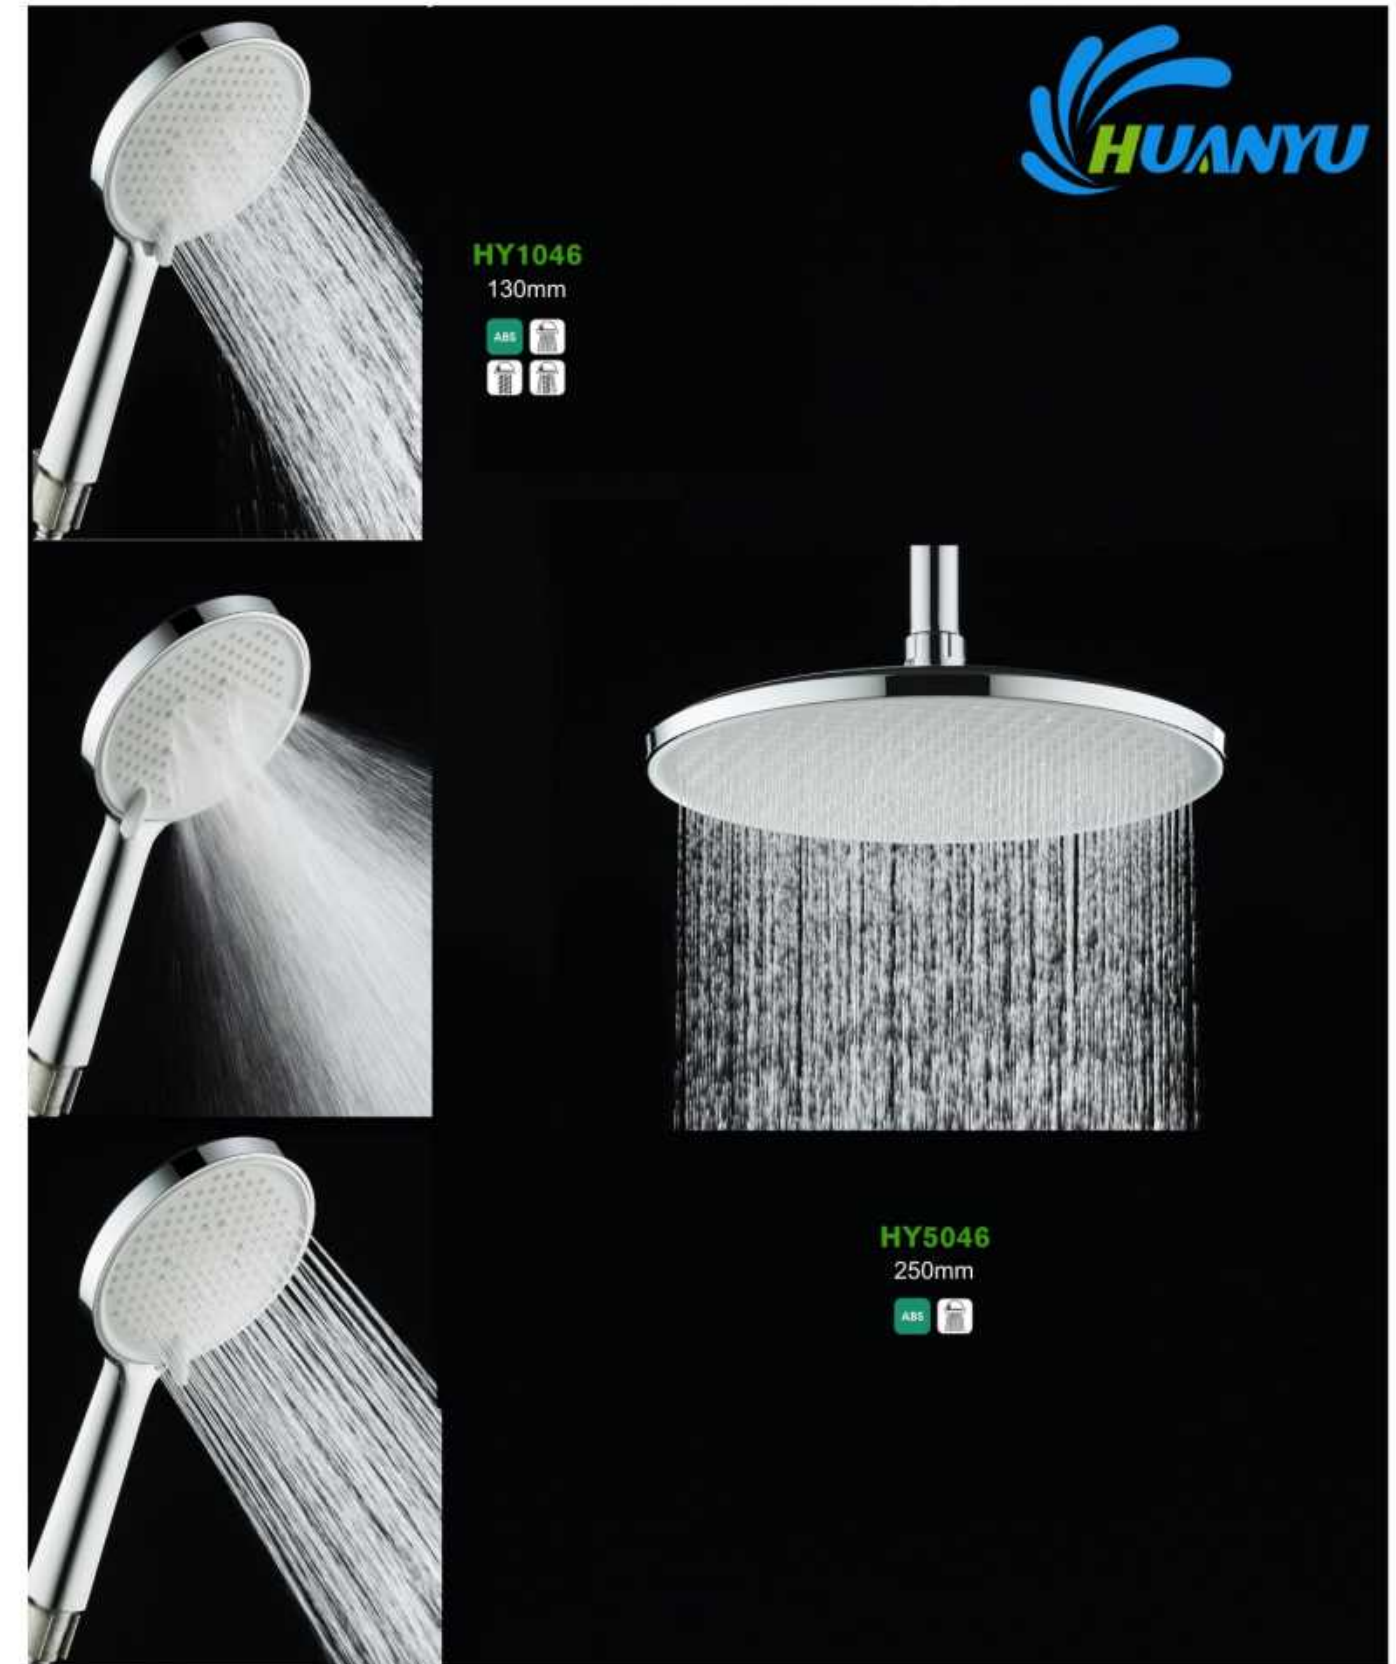

Good quality not mean high cost, low cost also has good quality!
